

Recent security changes resulted in being able to enter multiple hospital codes in the "Hospitals" box at the top of the Select a Population screen. As a result, it is no longer necessary to use the "Edit Selection" box to select all cases vs. unique primaries. The purpose of this E-News is to demonstrate how to select cases in a multi hospital system for cases in all facilities, cases for select hospital groups and unique primaries. **Note: The examples below are using our test database that has 10 facilities.**

1. The population below shows how to select all unique primaries in a multi hospital system for analytic cases diagnosed in 2017. By leaving hospital code blank, the system will select all 2017 unique analytic primaries for hospitals 01-10 in our database.

Note: The user must have access to report on all hospitals data to be able to leave hospital code blank.

Leaving hospital code blank, the all flag is used to select all unique primaries for hospitals 01-10

Results = 9918 total cases for hospitals 01-10

By clicking Edit Select, the user can see the selection criteria of the population. Below are two examples of selecting by hospital code.

This example shows the All_Flag = Y because the hospital code was left blank. Therefore the cases selected are all unique primaries.

In this example, the Edit Select shows that hospital code 01 was used to select all cases for hospital 01.

- The population below shows how to select ALL analytic cases diagnosed in 2017 for a group of specific facilities. Enter the hospital codes separated by commas as shown.

Select a Population

Population Label: ALL ANALYTIC 2017 CASES FOR HOSPITAL 01-03

Hospitals: 01,02,03

Requested By: Training Registrar Logi Request Date: 03/2

Analytic Cases Only
 Complete Cases Only

Abstract/Suspense Cases

Abstract Cases Only
 Suspense Cases Only
 All Cases

Item Nbr	Item Description	Relation	Data Values	Logic
1	3732	Date of Diagnosis - Year	= 2017	And
2				
3				
4				
5				

Start Time: 3:49:19 PM End Time: 3:49:19 PM Records Selected: 4441

Entering these hospital codes selects all cases for hospital 01, 02 and 03. **Note: The user must have access to run reports on the facilities entered in this field.**

Results = 4441 total cases for hospital 01, 02 and 03

- The population below selects only UNIQUE primaries for a specific list of hospitals for analytic 2017 cases.

Select a Population

Population Label: ANALYTIC 2017 CASES UNIQUE PRIMARIES 01-03

Hospitals:

Requested By: Training Registrar Logi Request Date: 03/2

Analytic Cases Only
 Complete Cases Only

Abstract/Suspense Cases

Abstract Cases Only
 Suspense Cases Only
 All Cases

Item Nbr	Item Description	Relation	Data Values	Logic
1	3732	Date of Diagnosis - Year	= 2017	And
2	54	Hosp Code	= 01,02,03	And
3				
4				
5				

Start Time: 4:05:32 PM End Time: 4:05:32 PM Records Selected: 3582

By leaving this blank, the "all" flag is used to select only unique primaries

By entering the hospital codes here we are limiting the selection to only those cases for hospitals 01, 02 and 03. **Note the user must have access to run reports on the facilities listed here.**

Results= 3582 unique primaries for hospitals 01, 02 and 03

Note: This E-News should replace any previous ones concerning how to select these populations!
