

# CRStar by Health Catalyst

## Enhancements & Corrections

February 27, 2024

### Enhancements

- New integrated CRStar by Health Catalyst logo on login screen
- NCDB Screen and Export has been updated for the 2024 Call for Data requirements
- Zip Code maintenance screen has been updated to REACT version
- An update was made to the surgery screen to default the proper B surgery codes for additional sites effective with Dx year 2024+
- An additional filter option has been added to the Select a Pop screen. Please read the "Insight" titled "Differences in Select Pop Case Inclusion Settings" found under the Reporting section on the CRStar Resource Page.

### Corrections

- A correction was made to the Neoadjuvant Therapy Effect field to show proper choices for Cervix cases with Dx year 2021+

### State Specific Updates

- New Hampshire – a state screen and the v23 export are now available

Metafile Names	
California (released 01/19/2024)	CA_v23B
