

CRStar Insights

Differences in Select Pop Case Inclusion Settings

There are now three inclusion options in the Enhanced Reporting Select a Population function:

- Include All Primaries
- Include Unique Primaries from this population criteria
- Include Unique Primaries from among all hospital's primaries.

This Insight will highlight the differences between the three categories, and explain how each of them work.

Include All Primaries

Utilizing this option will first look at all cases for all facilities (or all cases for those specific hospitals entered into the Hospitals field), and then apply the selection criteria (logic) entered.

This option should be used when all primaries are wanted for each facility that have been abstracted for if in a multi-hospital setting.

The screenshot shows the 'Select a Population' interface with the following details:

- Population Label:** test pop
- New Label:** (empty)
- Requested By:** Jonathan R
- Request Date:** 02/14/2024
- Hospitals:** (empty dropdown)
- Inclusion Options:**
 - Include All Primaries
 - Include Unique Primaries from this population criteria
 - Include Unique Primaries from among all hospital's primaries
- Other Options:**
 - None
 - Dx Date
 - 1st Contact Date
- Abstract/Suspense Cases:**
 - Abstract Cases Only
 - Suspense Cases Only
 - All Cases
- Case Type:**
 - Analytic Cases Only
 - Complete Cases Only
 - Incomplete Cases Only
 - Non-Reportable State Flag
- Site Codes Table:**

Site	Site Description
1	
2	
3	
- Selection Criteria Table:**

Item Nbr	Item Description	Relation	Data Values	Logic
1	3783 First Contact Date - Year	=	2022	And
2				
3				
- Summary:** Start Time: 3:23:37 PM, End Time: 3:23:38 PM, Records Selected: 6620

Include Unique Primaries From This Population Criteria

Utilizing this option will first look at all cases for all facilities (or all cases for those specific hospitals entered into the Hospitals field), then apply the selection criteria, then filter to the unique primaries.

This option should be used when only unique primaries are wanted regardless of how many times the same primary has been abstracted for different facilities within the database.

Note: Best class of case in order of priority:

14,13,12,11,10,22,21,20,00,40,32,31,30,37,35,33,38,43,49,34,36,41,42,99,blank

Start Time: 3:25:08 PM End Time: 3:25:09 PM Records Selected: 5500

Include Unique Primaries From Among All Hospital's Primaries

Utilizing this option will first look at all cases for all facilities (or all cases for those specific hospitals entered into the Hospitals field), then identify unique primaries, then apply the population selection criteria.

This option should be used for state submissions for states that only want a primary submitted for a patient from a single facility, regardless of how many times that primary has been abstracted for other facilities in the database.
