

# CRStar Insights

## Illinois New Case & Corrections Submissions

The IL Central Cancer Registry requires that facilities submit new cases as well as cases that have been corrected since the initial data submission. This CRStar Insight will illustrate the submission of both new and corrected cases.

Cases are selected via the Select a Population function using the State Report Flag field as criteria. New case records that are ready for transmit should have the State Report Flag set to "Y" by the abstractor upon completion. Modified records will have a State Report Flag of "C" (if the data modifications involve fields that trigger a correction record). The "C" flag is assigned automatically by CRStar based on Illinois State Cancer Registry Standards.

To select new case records for transmit, create a population that selects all cases where the State Report Flag is coded to a "Y" as shown below.

**Select a Population**

Population Label: State Transmit

Requested By: Nicki SkipperRequest Date: 05/12/2023

Hospitals: 11GENERAL HOSPITAL

☐ Include Duplicates of Shared Patients

☐ Dx Date☐ 1st Contact Date

From: mm/dd/yyyyTo: mm/dd/yyyy

Abstract/Suspense Cases

Case Type

☒ Abstract Cases Only☐ Analytic Cases Only

☐ Suspense Cases Only☐ Complete Cases Only

☐ All Cases☐ Incomplete Cases Only

☐ Non-Reportable State Flag

To export the data, click on Enhanced Reporting > Data Exports > State export. Select your population label. The Filename will default to “State Export” and can be modified as needed. For Export Type, select “Corrections” as shown below:

The screenshot shows a web form titled "Export State Data". It contains the following fields and options:

- Population Label:** A dropdown menu with the selected value "State Corrections Export July 2023".
- Filename:** A text input field with the value "State Export".
- Options:** Three unchecked checkboxes:
  - ☐ Update State Report Flag and Transmit Date
  - ☐ Run GenEdits after Export
  - ☐ Zip Data File
- Export Type:** Two radio button options:
  - ☐ New
  - ☒ Corrections
