

CRStar Insights

Export Position of NAACCR Text Fields

This insight provides the list of NAACCR Text fields and their purpose along with the CRStar field names that they are tied to.

These fields are found in CRStar on the Text screen. It is important to document as defined in the **Description of Use** column. These fields export to the state in the designated position with the respective related text. Except for the Primary Site, Histology and Place of Dx fields up to 1000 characters are available for export.

CRStar Field Name	NAACCR#	NAACCR FIELD NAME	Description of Use
Prim Site Text	NAACCR# 2580	Text--Primary Site Title	Description of primary site
Histology Text	NAACCR# 2590	Text--Histology Title	Description of histologic type, behavior, and grade.
