Using Limiting Values in a List Pop Report

In the Reporting Module, under Ad hoc Reports, is the List Pop tab. The use of limiting values in a List for Population is especially useful for limiting criteria on a previously selected population. By utilizing any report label within CRStar, the user can apply limiting values when running a list pop report. Entering values in this field limits the details of the report. Multiple values may be entered using a comma (no space) between the data values.
