

CRStar Insights

Select a Population Labels for CoC Surgical Standards (Standards 5.3 – 5.8)

This CRStar Insight will demonstrate how to create Select a Population labels for each of the CoC Surgical Standards using case identification guidelines provided in the CoC’s [Operative Standards Toolkit](#).

Basic Information

Each standard has its own set of guidelines for selecting cases. All guidelines specify Class of Case (analytic only) and Accession Year (2021 or after). All labels should have “Analytic Only” selected in the “Case Type” section. The Accession Year(s) can be selected by clicking the “1st Contact Date” selection and entering a date range as shown in the screenshot below:

Select a Population

Population Label:

Requested By: Request Date:

Hospitals: ERS Hospital Systems ☒ Include All Primaries ☐

☐ None ☐ Dx Date ☒ 1st Contact Date From: To:

Abstract/Suspense Cases Case Type

☐ Abstract Cases Only ☒ Analytic Cases Only

☐ Suspense Cases Only ☐ Complete Cases Only

☒ All Cases ☐ Incomplete Cases Only

☐ Non-Reportable State Flag

An alternative is to leave the date selection criteria set to “None” and use item #3783 (First Contact Date–Year) in the Selection Criteria as shown below:

Selection Criteria					
	Item Nbr	Item Description	Relation	Data Values	Logic
1	<input type="text" value="3783"/>	<input type="text" value="First Contact Date - Year"/>	<input "="" type="text" value="="/>	<input type="text" value="2023"/>	<input type="text" value="And"/> <input type="button" value="Copy"/>

A Note About Surgical Codes

The following examples all use the “Surgery Code Here–Consolidated to Latest Standard” field (CRStar item #4546) to accommodate the use of cases with any Accession Year.

The applicable criteria for each standard are listed on the following pages, along with a screenshot of each Select a Population label.

CoC Standard 5.3 - Sentinel Node Biopsy for Breast Cancer

- **Primary Site Breast** – set Site Code = 50
- **Breast cancers of epithelial origin** – use #153 (Histology), relation is "=", copy and paste the following into the "Data Values" cell:
8000*,8010*,8022*,8032*,8035*,8041*,8070*,8140*,8200*,8201*,8211*,8246*,8255*,8290*,8314*,
8315*,8401*,8410*,8430*,8480*,8500*,8501*,8502*,8503*,8504*,8507*,8509*,8510*,
8513*,8520*,8521*,8522*,8523*,8524*,8525*,8530*,8540*,8541*,8543*,8550*,8570*,8571*,8572*,
8574*,8575*,8982*,8983*
- **Date of sentinel lymph node biopsy field is not blank** – use #4306, relation is "<>", leave "Data Values" blank
- **Sentinel lymph nodes examined = 01–90, 98** – use #4305, relation is "<>", enter 4 lines and set <> blank, 00, 95, 99 (one data value per line)
- **Scope of regional lymph node surgery codes: 2, 6, or 7** – use #2113, relation is "=", enter 2,6,7 into "Data Values"
