## Enhancements & Corrections

April 30, 2025

### Enhancements

- Quality Measures have been updated to the latest available criteria:
  - **Six New Quality Measures:** BneoCT, RneoRT, BLCT1, CBRRT, KPN, PTSRV
  - **Ten Updated Quality Measures:** GCTRT, G16RLN, RCRM, BCSdx, BCSRT, ACT, C12RLN, LCT, MadjRx, HadjRx
  - **Six Retired Quality Measures** (still available with no changes): RECRTCT, MAC, HT, MASTRT, nBx, LNoSurg

### Corrections

- The v25 related fields for the **Custom Forms** and **Print Abstract Summary** have been added. An error will no longer occur.
- A correction has been implemented to ensure all values on the SSDI screen are saved, including those entered on the **Staging** tab.
- The **Diagnosis**, **BPM**, and **Retired** screens tab order has been corrected.

### State Specific Updates

- **Hawaii:** The modified option has been added, along with the list of fields required by the HI Central Registry's corrections.
- **Maryland:** The modified option has been added, along with the list of fields required by the MD Central Registry's corrections.
- **North Carolina, New Jersey, Tennessee, and Wisconsin** have all had their v25 modified field lists updated in accordance with their central registry.
