Enhancements & Corrections
June 3, 2025

Enhancements

- The CRStar *Workflow Navigator* module has been released. Please refer to the CRStar Insight "**Workflow Navigator**" for more details.
- TextPad has been enhanced to enable sizing and independent window options.
- An email field has been added to the Registrar's profile.
- The NPI field has been added to the Physician Roster report.
- The v25 state export is now available for the following states: **IA, KS, MN, NC, and SC.**

Corrections

- Several updates were made to List Pop to improve functionality and usability. Users can now delete multiple rows consecutively without issues. Headers are included in the Excel export, and formatting has been corrected. Print preview styling has also been updated for better readability. Additionally, the Report Label List is now sorted by date (oldest to newest), and when a Sub Pop Label is created, List Pop now displays accurate results.
- The CPM, BPM, and RPM screens have been updated to display context-specific help notes when the F1 key is pressed.
- A fix has been implemented to handle duplicate Physician IDs, allowing them to be properly corrected or deleted.
- The Hospital Look-Up and Search has been corrected, ensuring accurate results.

State Specific Updates

- **Arizona:** The Arizona export has been updated to include the Registry ID number.
