South Carolina Case Corrections / Modifications

South Carolina has provided software vendors with a list of specific fields which, when modified (in a previously submitted abstract) should prompt the resubmission of the case to the Central Registry. Modified case exports should include all cases which have been modified in any of the fields included in the list seen on page 2 of this document.

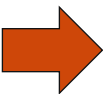

To trigger the re-export of a previously submitted and now modified case, the State Report Flag must be changed from a T to a C.

NOTE: The process of automating this change to the State Report Flag is in progress. We anticipate that this feature will be completed and initiated with the July 2025 CRStar Upgrade.

Manual Review and Re-Code of the State Report Flag

When updating cases, if any of the fields specified in the list on page 2 are modified, the user should ensure that the State Report Flag has been changed from a T to a C.

This can be performed on the Case Admin screen

Date Abstracted:

09/13/2019

Abstractor Initials:

DC

RCRS Case:

State Rpt:

C

Or on the Patient Maintenance screen
