Enhancements & Corrections

August 5 & 6, 2025

Enhancements

- Updated Audit Logs to capture deletions of fields and patient records.
- Updated login page layout and styling.
- Updated RCRS export screen in response to the termination of the NCDB Annual Call for Data.
- Added new display date fields to the Case Admin screen to capture RCRS submission dates.
- Updated Drug and Regimen tables with the latest SEER list.
- Updated *State Specific Screens* for **AZ, CA, NM, and TN**.
- The following states now have the v25 state export available: **AL, AZ, CO, FL, LA, MD, MI, MS, NE, NH, RI, SC, TX, VA, WV, and WY**.

Corrections

- Spelling and capitalization corrections made to **Case Admin** screen field labels.
- A correction now allows drop-down values to display for Thymus schema.
- Latest consolidated standard surgical code fields updated for Skin and Colon crosswalks.
- The **Suspense by Site** dashboard graph no longer includes suspense cases with a state report flag equal to an "N".
- Dashboard graphs updated to the most recent version, producing the same quality measure results as found on the quality measure screen.

State Specific Updates

Massachusetts – Correction list for modified record submissions has been added in accordance with their Central Registry.

South Carolina - Correction list has been updated for the modified submissions in accordance with their Central Registry.
