Enhancements & Corrections

October 16, 2025

Enhancements

- A new enhancement alerts you when a patient record and/or the same primary is already open by another user.
- Diagnosis Date has been added as an option to display in the Workflow Navigator.
- A reassign button has been added to the Workflow Navigator as well as an “unassigned” filter option.
- Facilities in the following states were provided the v25 state export on 9/15/2025: **AR, CA, FL, HI, MA, ND, NV, OH, and OK.**
- Facilities in South Dakota were provided with the v25 state export with today’s upgrade.

Corrections

- The TextPad now maintains the pop-up sizing once it has been closed and re-opened. Additionally, it will not appear blank when returning to the DX screen.
- The Dashboard now recognizes if the *Admin Only* checkbox has been activated on any graph in the *Dashboard Settings Screen* for that facility.
- The Dashboard graph calculations now display the data to the screen even if percentages are below 0. Additionally, the F/U Calcs percent has been expanded to display four digits.
- The color-coding now allows the Sequence (FIN#118) and Hospital Code (FIN# 54) on the *Patient Maintenance Screen* to display the color set in the Global DIR for that facility.
- As per CoC advice, the year timeframe now displays 2009-2025 on the *RCRS Export Screen*.
- The SEER EOD primary tumor and EOD Regional Nodes fields codes and descriptions for Vulva and Pancreas schemas have been corrected.

See page 2 for State Specific Updates.

State Specific Updates

Metafile Names	
Arkansas	AR_v25B
California	CA_v25B
Florida	FL_v25B
Hawaii	HI_v25B
Idaho	ID_v25B
Massachusetts	MA_v25B
North Dakota	ND_v25B
Nevada	NV_v25B
Ohio	OH_v25B
Oklahoma	OK_v25B
South Dakota	SD_v25B

****Note:** All metafiles except South Dakota were made available on September 15, 2025. Also, California and Florida have since been updated and released in this upgrade.
